

## PREMEDICINE

ADVISER: Deborah G. Duke, Ed.D.

Most schools of medicine require for admission a minimum of three years of college work with a strong GPA and relatively high scores on the Medical College Admissions Test (MCAT); however, preference is given to those who have a bachelor's degree. Students who wish to complete a baccalaureate degree before transferring to medical school may elect any major. It should be remembered that the Medical College Admissions Test is based on a science and verbal emphasis, and the program of study should be planned accordingly. Upon request, Harding will confer the bachelor of science degree with a major in general science on students who complete two years in an approved school of medicine and who meet Harding's Liberal Arts and premedical requirements.

Although students may choose any major, the following courses should be included in their academic plans for the first three years. These courses are necessary to prepare for the Medical College Admissions Test, which should be taken near the completion of the spring semester of the junior year. Most medical schools require many, if not all, of these courses as prerequisites. Additional science electives are also recommended.
